

EYE CLOUD PRO TOTAL EYECARE PRACTICE MANAGEMENT WITH FULLY INTEGRATED EHR

Eye Cloud Pro's web-based management software for optometry practices was developed by optical pros, for optical pros.

We understand the needs of your entire business and deliver you a flexible, easy-to-learn tool. We handle everything. We can invoice your patients, while managing your inventory with amazing accuracy and a fully integrated EHR. We can also automate the appointment and recall system using the latest technology. No need for third party solutions.

Our software gives you all the power you need to run your practice more efficiently and profitably—without installing software on your office computers. We handle all the software updates, data backups, host and maintain the data server. You simply need a browser on any Windows or Mac machine. You can even use an iPad for most functions. Say goodbye to complicated medical systems. This is the most user-friendly system in the eye care world.

Simple, yet easy to use EHR

- Customizable EHR templates
- Referral letters created from saved templates
- Auto create annual exam recalls by starting a new exam
- System suggested diagnosis codes based on your final prescription
- Track Tonometry readings at a glance with a graph
- Optional integrated e-Prescribing
- Print glasses and contact lens prescriptions with Dr signature
- Quickly reference prior exam information

Optical

A retail system that is second to none enhancing the patient experience and staff efficiency

- Unique tagging system allowing you to track age of the frame
- Real time inventory reports, whether you have 1 location or 30+
- Vision Web Integration
- ABB and OOGP Integration
- Dashboard showing current status of each job
- Send text or email job status updates to the patient
- Easily view historical information and copy if desired
- Electronically transmit frame orders

Practice Management

- In office messaging system
- Simply manage patient appointments and recall with built in text, email, and phone messaging
- Use SMS and email messaging to send receipts and prescriptions
- Robust reporting system
- Very simple and fast checkout including credit card integration with Fullsteam Merchant Services
- View your sales totals in one click on your mobile phone, tablet, or computer
- Online appointment request
- Create, invoices, payments, and insurance payments quickly
